IN THE CLAIMS:

1.- 15. (Cancelled)

16. (Currently Amended) A compression apparatus comprising:

5 a foot sleeve including an inflatable body configured for disposal about a foot, the foot sleeve including a metatarsal portion;

the foot sleeve further having a contact layer and an outer layer, the layers fixedly joined at a perimeter of the foot sleeve defining a first piece;

a heel strap comprising a first layer and a second layer fixedly joined at a perimeter of the first and second layer, and a third layer between the first and second layer and the three layers defining a second piece; and

15 wherein a portion of the second piece is received within the first piece between the contact layer and outer layer at the perimeter of the first piece, and the second piece is fixedly joined at the perimeter of the first piece, the second piece projects out through the sealed first piece at its perimeter and
20 extends a substantially length outwardly therefrom for wrapping over and around the foot adjacent an ankle of a patient.

17. (Previously Presented) A compression apparatus as recited in claim 16, wherein the first layer and second layer of the second piece is fixedly joined at the perimeter of the first and second layer for sealing the third layer.

5 18. (Previously Presented) A compression apparatus as recited in claim 16, wherein the third layer includes a foam material for cushion during patient use.

19. (Previously Presented) A compression apparatus as recited in claim 16, wherein the second piece has at least one segmented portion configured for contour with the foot.
10

20. (Currently Amended) A compression apparatus as recited in claim 16, wherein the ~~strap~~ first layer of the strap having an outer surface that includes a loop material such that the metatarsal portion includes hook elements that are engageable with the loop material on the second piece to mount the foot sleeve with the foot.
15

21. (Currently Amended) A compression apparatus as recited in claim 16, wherein the compression apparatus includes a plurality of second pieces extending from the foot sleeve body.

20 22. (Canceled)

23. (Previously Presented) A compression apparatus as recited in claim 16, wherein the second piece includes a plurality of layers, whereby the plurality of layers comprises an interiorly disposed cushion layer.
